BROMELIADS

A large group of Epiphyte (non-parasitic) plants, most of which grow upon the trees of the tropics, with ferns and orchids, in shade and in moisture-laden air.

Billbergias have bizarre brilliant colored flowers, usually in the winter. Aechmea have brighter colored leaves. This group is usually seen in the glass houses of botanical gardens and are greatly admired, but it is now proven that they make desirable house plants for American homes. Here in Southern California they flourish the year around in lath houses.

Billbergia distachia (pink, white and blue flowers).....	35c
nutans (pink, green and purple flowers)	20c
rubro-cynea (leaves heavily spotted)	50c
vittatus (leaves banded with white)	50c
Atkinson's Hybrids—very fine flowers	35c
Cass Hybrids—outstanding in shape and color	35c

We specialize in Bromeliads and have about 2500 plants of 75 species, mostly Billbergias and Aechmeas.

HYBRIDS

Some plant hybrids, excel in shape, color and vigor, the original species from which they were produced by pollenization.

Many of the outstanding plants, listed in the plant catalogues of today are hybrids of plants of lowly heritage. A touch of pollen by expert horticulturists, thru the years, changed many a wild flower into the plant aristocrats of today. Thus far the demand for Succulents has largely been for botanical species, but now outstanding Hybrids of some of those species are rapidly advancing in public favor.

The Hen and Chicken plant of past generations of men, is now bright colored, curly leaved and larger flowered.

SOME OUTSTANDING HYBRIDS

Aloe echinata + **A. humilis**. Stay small and spiny, 15c.

Byrnesia weinbergii + **Sedum adolphi**. A rare bi-generic cross. Some have Sedum flowers, others have flowers of the other parent, 15c.

Billbergia nutans + **Crypthanthus beuckerii**, long pink leaves, 35c.

Billbergia nutans + **Crypthanthus bahianus**, long narrow red brown leaves, 45c.

Echeveria harmsii—A new hybrid. Other parent unknown, leaves velvety magenta, 15c.

Pachyphytum oviforme—A very fine hybrid of this rare plant, 15c.

CACTI

Cereus formosum monstrosum, 15c-25c; C. peruviana 3 to 4 in., 10c.

Ferocactus acanthus, 15c-35c; F. veridescens, 10c-25c.

Harrisia bomplandii, 10c; H. martinii, 10c.

Mamillaria elongata, 10c; M. dioica, 10c; M. fragilis, 10c, M. bocasana, 10c; M. mystax, 15c.

Notocactus leminghousi, 25c; N. ottonis, 10c; N. submammulosus, 15c.

Nyctocereus serpentinus, 10c.

Opuntia erinacae, 15c; O. mammillata, 10c; O. mammillata crests, 20-45c; O. vilis, 5c.
